# SEO - STRAT - EGY

Search engine optimisation (SEO) is the process of affecting the visibility of a website or a web page in a web search engine's unpaid results—often referred to as "natural", "organic", or "earned" results. In general, the earlier (or higher ranked on the search results page), and more frequently a site appears in the search results list, the more visitors it will receive from the search engine's users, and these visitors can be converted into customers. SEO may target different kinds of search, including image search, local search, video search, academic search, news search and industry-specific vertical search engines.

# THE CMR MIND MAP

A mind map is a diagram used to visually organise information. A mind map is hierarchical and shows relationships among pieces of the whole.

It is often created around a single concept, drawn as an image in the centre of a blank page, to which associated representations of ideas such as images, words and parts of words are added.

---

A mind map is a diagram used to visually organise information. A mind map is hierarchical and shows relationships among pieces of the whole.

It is often created around a single concept, drawn as an image in the centre of a blank page, to which associated representations of ideas such as images, words and parts of words are added.

Major ideas are connected directly to the central concept, and other ideas branch out from those.
